

6516205900.txt

I spend many hours a day in my vehicle as a pizza delivery driver. XM Satellite Radio provides me with a fantastic variety of music that I can never get enough of. But more importantly to me XM radio gives me the only refuge I have where I can get away from the constant bombardment of Radio, TV and Internet advertising. XM Radio currently doesn't provide traffic and weather reports in the city I live but I look forward to when I can get them. I urge you to reject the NAB's petition 04-160 and to give me the CHOICE that as an American citizen I am granted by the Constitution of the United States to listen to my choice of programming.
